INIVI ORIGINAL HEADWEAR

Less about removing seams, more about redefining how headwear should look, feel and perform.

WHAT MAKES INIVI ORIGINAL HEADWEAR DIFFERENT?

INIVI ORIGINAL is the brother range of our flagship premium INIVI Range, built on the same technical foundation. Through advanced construction techniques and patented processes, it delivers headwear that is distinctive in design, refined in appearance and high quality.

SEAMLESS FRONT PANEL

Unlike standard caps with visible front seams, INIVI's Seamless Front Panel provides a clean, uninterrupted surface across the front of the cap. This results in a sharper, more premium appearance and offers an ideal canvas for branding, embroidery and graphic applications.

SEAM-FREE TECHNOLOGY

INIVI's Seam-Free Technology minimises unnecessary stitching while maintaining structure and shape. By reducing internal pressure points and rigid seams, this construction enhances comfort, flexibility and wearability. The result is a sleek, well-defined form across all styles.

Seamless Front Premium Heavy Cotton Cap

Crafted from 100% premium heavy cotton, this cap features a seam-free front panel for a clean and refined appearance. The pre-curved peak provides a comfortable fit, while the hidden adjustable closure ensures a secure and stable fit with a neat finish, making it suitable for everyday wear and versatile styling.

OG221

FEATURES:

Size: OSFM

Panels: 5

Contents: 100% Premium Cotton

Sweatband: Moisture-wicking Mesh Knit

Closure: Unique tuck-in buckle closure

AVAILABLE STOCK COLOURWAYS
